# The Munich Flat Finder

Mathilde Barbier
Code Institute Project - Stream One

Objective of the project

Being a newcomer in Munich can be complicated. The objective of this app is to help foreigners with the worst part of it: finding a flat.

The application will :
- Present information about Munich areas
- Show flats in each areas
- Provide additional resources to look for flats
- Provide tips for the search and after the search

The user is :
- A foreign newcomer in Munich
- Earning enough to select their area of living
- Limited knowledge in the German culture and administration

Features

General

- Single Page application
- Sliding menu from the right (mobile)

Flat Finder Features

- Get data from ImmoScout24
- Present the data on a Google Map
- Show results according to the selected area
- Show other relevant data according to the selected area

FAQ

- Provide answers on various topics related to finding a flat in Munich
- Present the FAQ in an accordion for easier use

Contact Form

- Send an email to me

Technologies Needed

ANGULARJS
- handle page routing
- calls to the API
- build custom directives

Bootstrap
- give the project a simple, responsive layout

npm
- manage some of the dependencies in our application

- manage the installation of our libraries and frameworks

API:

Anything Missing?

Questions

General Project

- Is this respecting the scope of the project ?
- Any advice?

Tests

- I would love to get guidance on the sort of tests I need for this project
